Introduction

Introduction

This document overviews enhancements related to the **Care in the Community** (CitC) Release 22.04.02 across the National Contact Tracing System (NCTS) and Covid Clinical Care Module (CCCM).

These enhancements will be released into production as part of the **22.04.02 Release on Thursday 24 February 2022**.

Recent Updates:

Rapid Antigen Testing (RAT) Update

Update:

To support the laboratory network and the very high demands they are facing, and in alignment with the changes expected in Phase Three of the Omicron strategy the Director of Public Health has agreed that we can urgently start to use RATs for all people presenting at Community Testing Centres (CTCs).

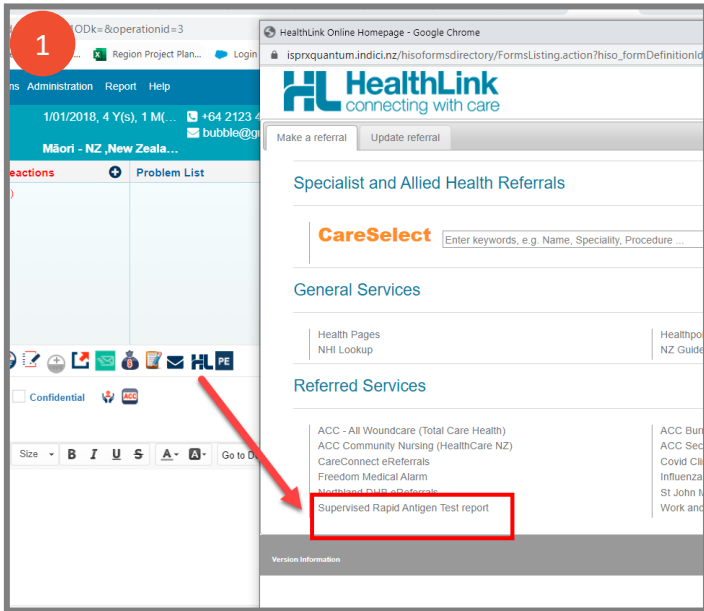

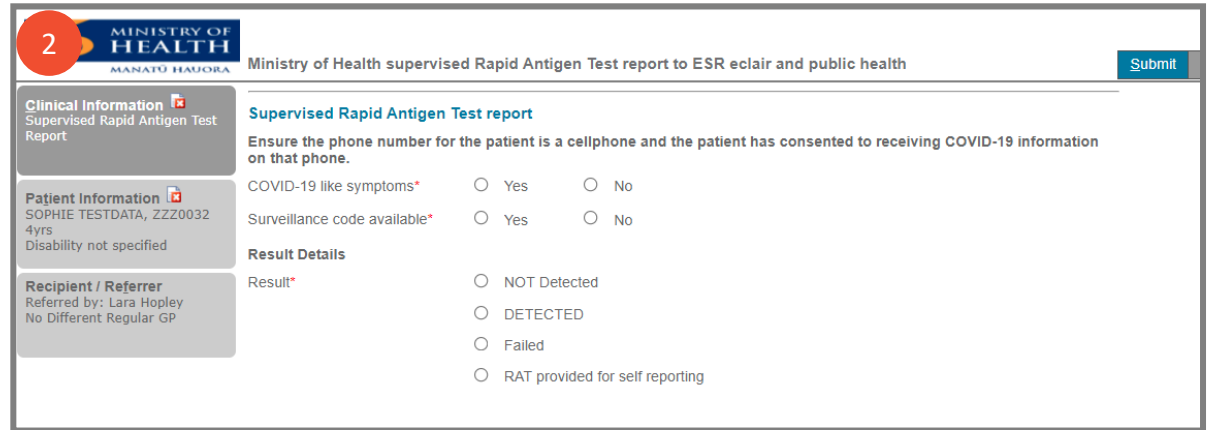

The changes outlined below are effective from midnight Tuesday 22 Feb 2022 and can be implemented at every CTC with RATS available. People who have a positive RAT are being instructed to enter their result into their My COVID record, this will then be pulled into NCTS and be managed as per normal (there may be some delays in these getting into the system as there are some manual work arounds that the Ministry need to do until automation is finalised).

We are currently anticipating that positive RATs will be pulling into NCTS and creating Case Records by the end of this week.

Case definition:

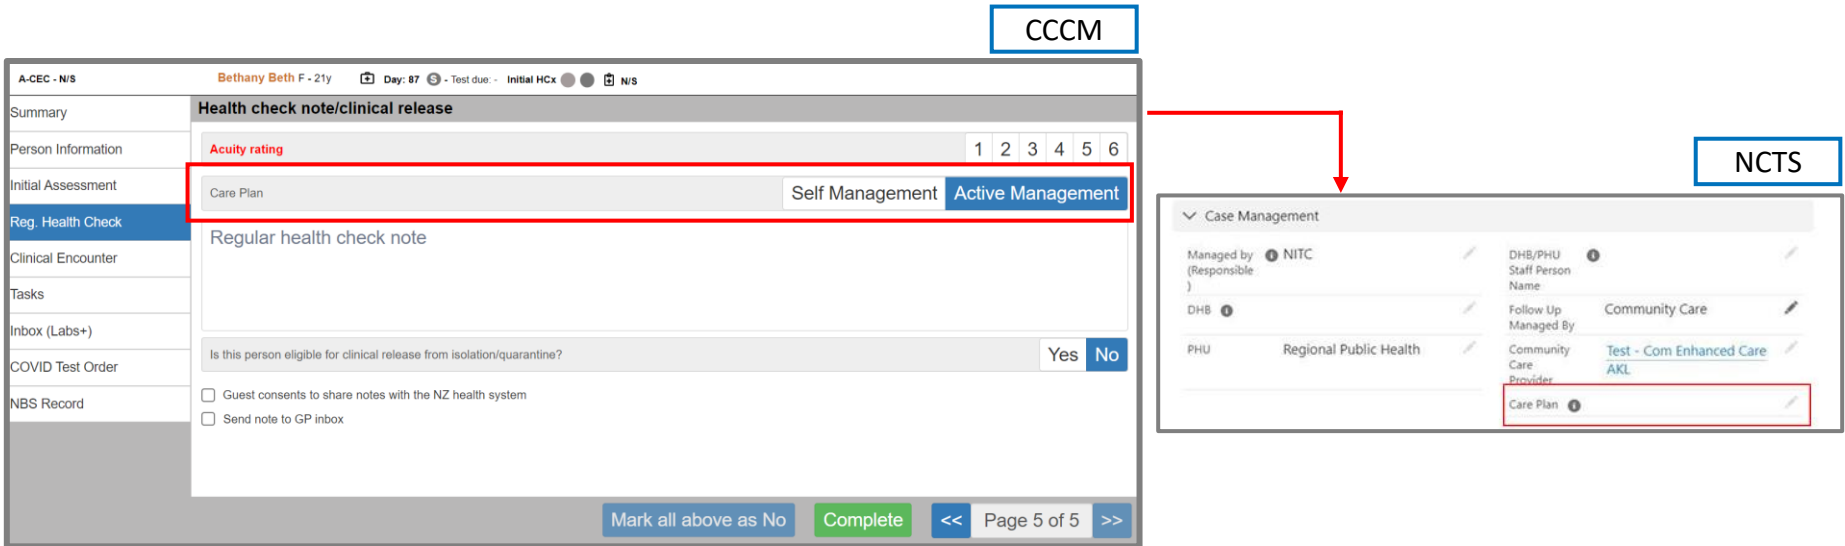

- A symptomatic person whose RAT is positive will be considered a probable case and not need be verified with a PCR.
- An asymptomatic close contact/ HH contact will be given a RAT – if positive then they are considered a probable case and will not be verified with a PCR.
- An asymptomatic person does not meet the testing requirements will not be given test as per current guidelines.
- Both confirmed and probable cases are treated as cases and are managed in the same way

Healthlink GP report a RAT

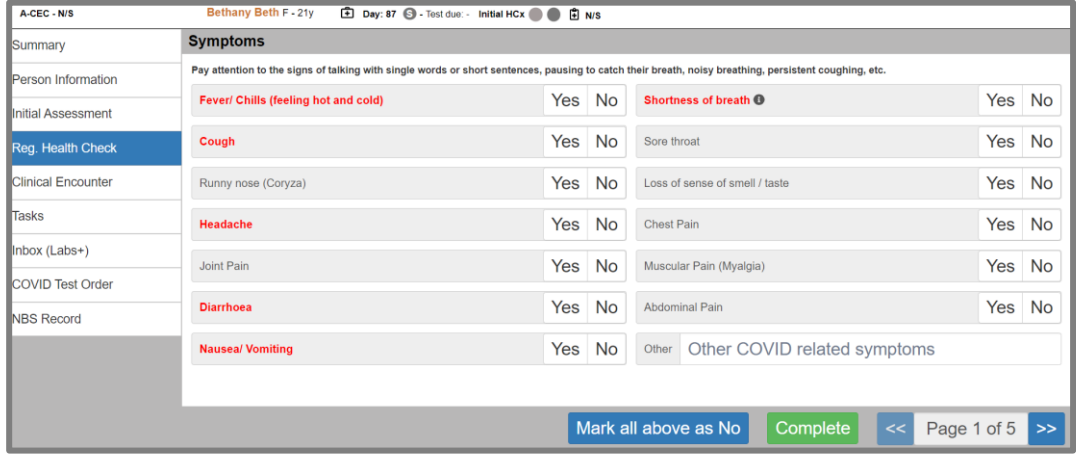

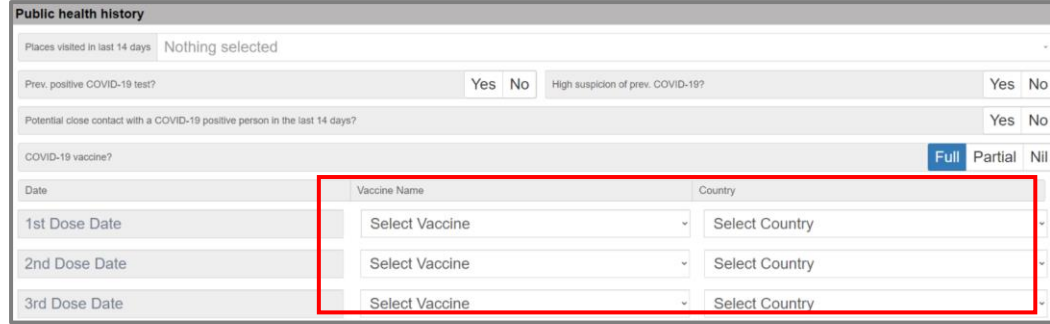

Description	What this means
<p>How to filter for Cases in CCCM</p>	<ol style="list-style-type: none"> 1. An update has been made to enable General Practice Teams open and view supervised rapid antigen test report by selecting the link in their HealthLink Forms via their PMS. 2. Where selected, the supervised rapid antigen test report will display. <p>Note: The report will appear in ESR éclair approximately 30 minutes and will trigger the case event in NCTS from there.</p> <div data-bbox="456 631 1156 1236">  </div> <div data-bbox="1202 698 2405 1123">  </div> <div data-bbox="1600 1156 2397 1229" style="border: 2px solid red; padding: 5px; text-align: center;"> <p>If you need support, please Healthlink on: 0800 288 887</p> </div>

22.04.02 Detailed Release Notes

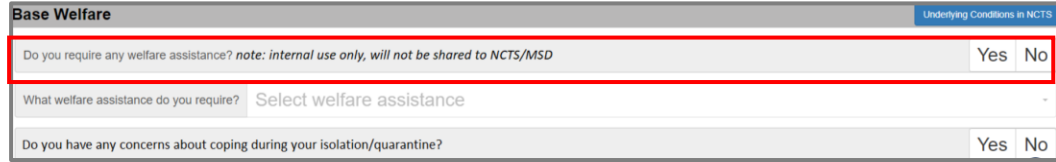

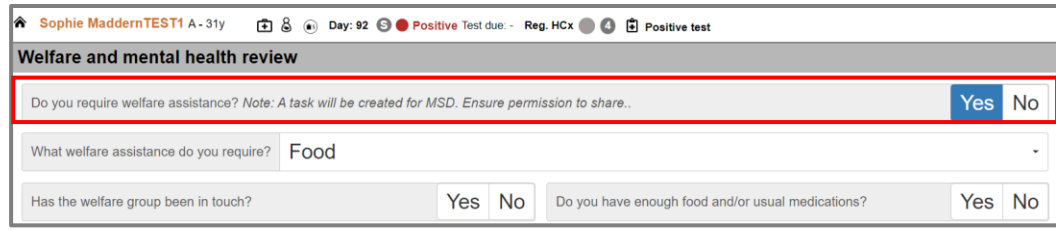

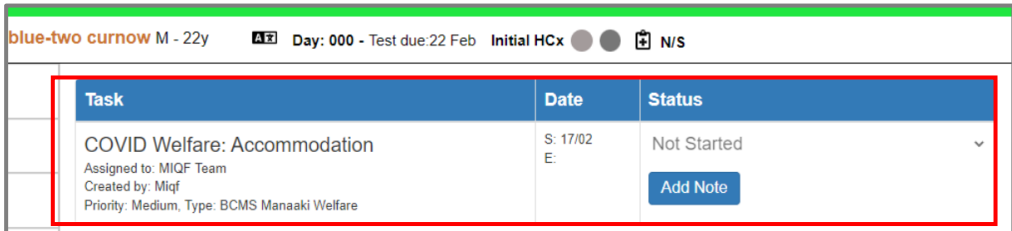

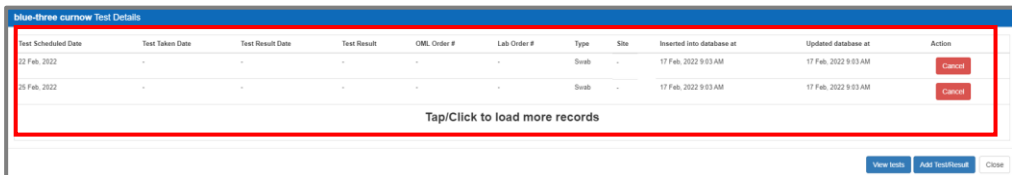

Change: Care Plan Assessment

Description	What this means
<p>Update to enable CCCM users to select Self Management or Active Management on a Case's Care Plan</p>	<p>An update has been made to enable CCCM users to select a Case's Care Plan Assessment to be either, Self Management or Active Management on the Regular Health Check (page 5).</p> <p>Where a Care Plan is selected, this information is written to the Note Timeline as part of the Health Check Note and is included on all Dashboards (filterable).</p> <p>Important: Where a Care Plan is selected in CCCM this information is sent to NCTS to enable NCTS users to identify a Case's Care Plan.</p> <p>Note: It is important to note that all cases will be automatically assigned to Self Management. Hubs will need to initially use their existing processes to identify cases that require Active Management. As activities are completed on cases e.g. regular health checks please update cases to 'Active Management' as required.</p> <div data-bbox="402 699 2237 1239">  <p>The screenshot illustrates the integration between CCCM and NCTS. On the left, the CCCM interface shows a 'Health check note/clinical release' form for a patient named Bethany Beth F - 21y. The 'Care Plan' dropdown menu is highlighted with a red box, showing options for 'Self Management' and 'Active Management'. A red arrow points from this dropdown to the NCTS interface on the right. The NCTS interface shows a 'Case Management' summary for the same patient, with the 'Care Plan' field also highlighted by a red box, indicating that the selection made in CCCM is reflected in NCTS.</p> </div>

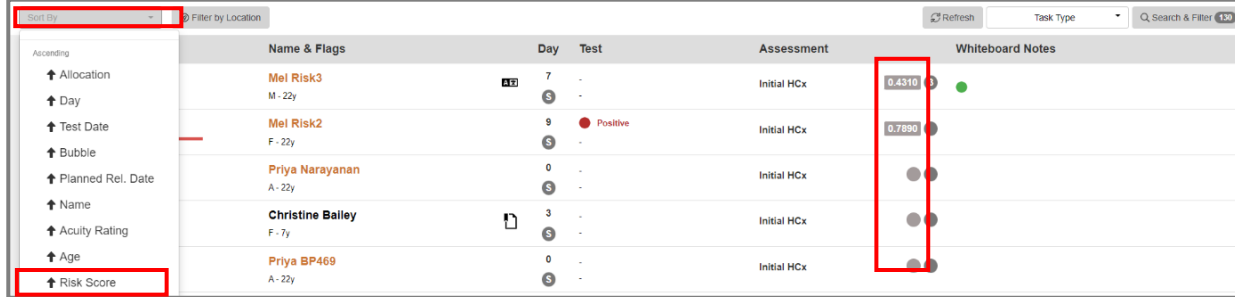

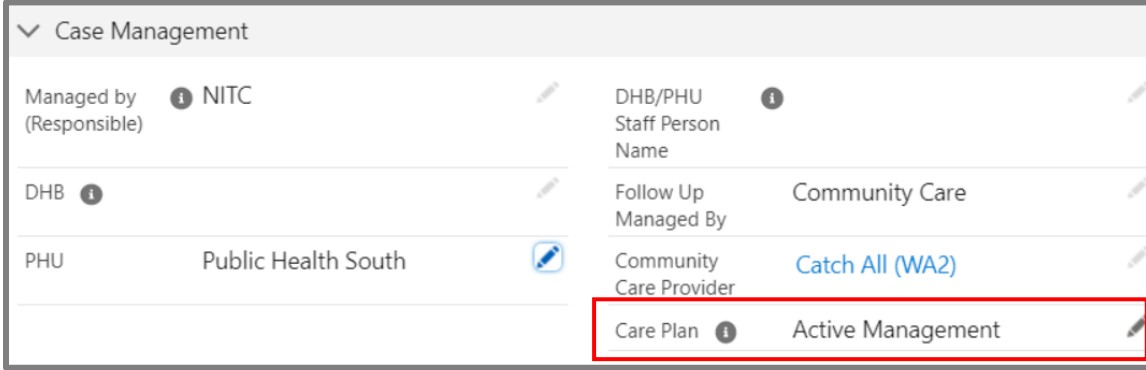

Change: Auto Open Regular Health Check and Update Vaccine Name and Country Name Fields

Description	What this means
<p>Completion of Initial Assessment automatically open to Regular Health Check</p>	<p>An update has been made where on completion of the Initial Assessment the Regular Health Check page will automatically open.</p> 
<p>Remove mandatory nature of Vaccine Name and Country Name</p>	<p>An update has been made to remove the mandatory nature of the Vaccine Name and Country Name on the Initial Assessment.</p> 

Changes: Updates to Welfare Questions and Welfare Task Visibility on Case and Disease Contact

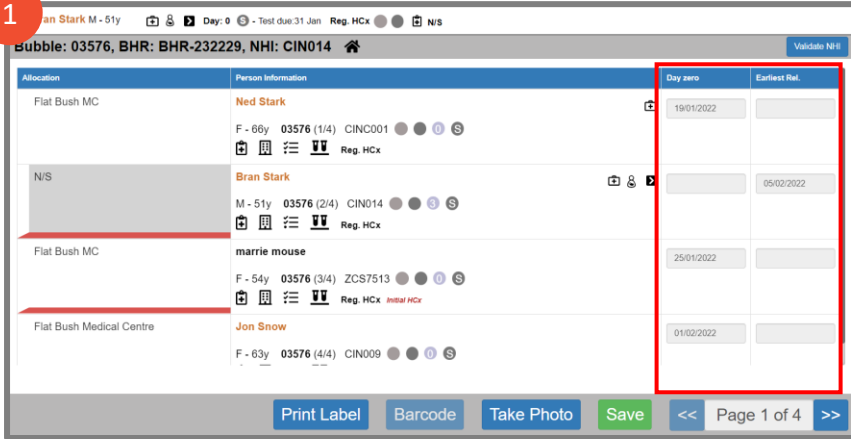

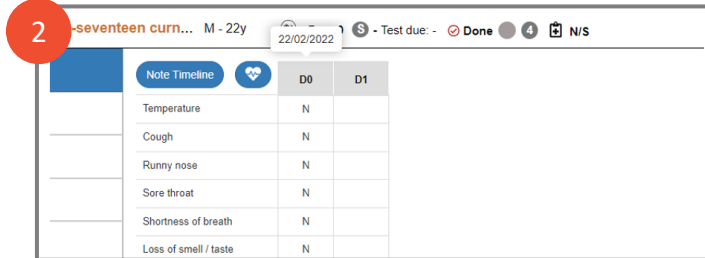

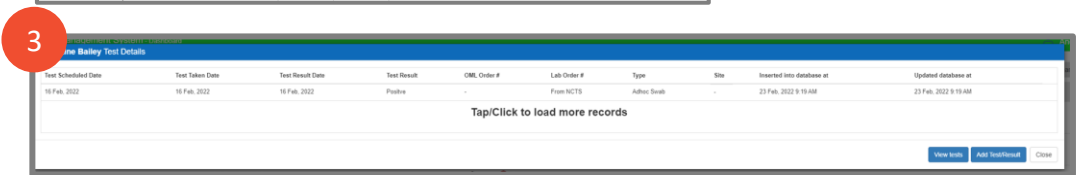

Description	What this means
Update to add guidance to Welfare Questions in CCCM	<p>To support users to understand if a Welfare Task will be generated and sent to MSD when completing an Initial Assessment or Regular Health Check, the following support text has been added:</p> <ul style="list-style-type: none"> Initial Assessment: <i>Note: internal use only, will not be sent to MSD.</i> Regular Health Check: <i>Note: A task will be created for MSD. Ensure permission to share.</i>  
Enable Welfare Task Visibility on Case and Disease Contact	<p>Update to allow read only access to Welfare Tasks completed for Cases and Disease Contacts in the Tasks tab (previously only showing for a Follow Up Case Record).</p> <p>Where Welfare information is updated in NCTS, these changes are automatically sent to CCCM to update the read-only view of the Task.</p> <p>This will enable CCCM users to view if a Case or Disease Contact has a welfare requirement and view any open or complete tasks and the relevant details of those.</p>  

Change:

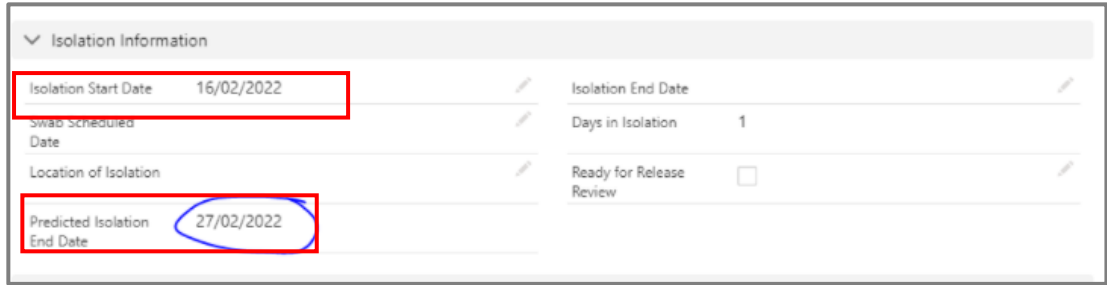

Description	What this means																																				
Update to Relabel Triage Score to Risk Score	<p>An update has been made to rename the Triage Score as Risk Score and give users the ability to sort by Risk Score in the Sort By List (for both ascending and descending options).</p> <p>You should only use this functionality if your Hub / DHB is manually populating the Triage Score in NCTS (this will flow through to the Risk Score in CCCM).</p>  <table><thead><tr><th>Sort By</th><th>Name & Flags</th><th>Day</th><th>Test</th><th>Assessment</th><th>Whiteboard Notes</th></tr></thead><tbody><tr><td>Ascending</td><td>Mei Risk3 M - 22y</td><td>7</td><td>-</td><td>Initial HCx</td><td>0.4310</td></tr><tr><td></td><td>Mei Risk2 F - 22y</td><td>9</td><td>Positive</td><td>Initial HCx</td><td>0.7890</td></tr><tr><td></td><td>Priya Narayanan A - 22y</td><td>0</td><td>-</td><td>Initial HCx</td><td></td></tr><tr><td></td><td>Christine Bailey F - 7y</td><td>3</td><td>-</td><td>Initial HCx</td><td></td></tr><tr><td></td><td>Priya BP469 A - 22y</td><td>0</td><td>-</td><td>Initial HCx</td><td></td></tr></tbody></table>	Sort By	Name & Flags	Day	Test	Assessment	Whiteboard Notes	Ascending	Mei Risk3 M - 22y	7	-	Initial HCx	0.4310		Mei Risk2 F - 22y	9	Positive	Initial HCx	0.7890		Priya Narayanan A - 22y	0	-	Initial HCx			Christine Bailey F - 7y	3	-	Initial HCx			Priya BP469 A - 22y	0	-	Initial HCx

What's planned?

Update Day Zero Mapping for Case and Disease Contact

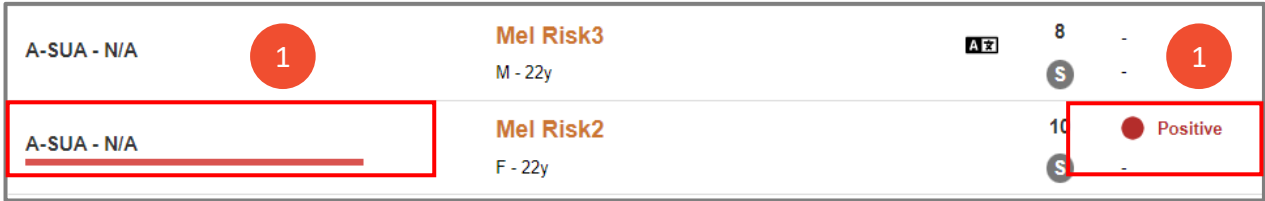

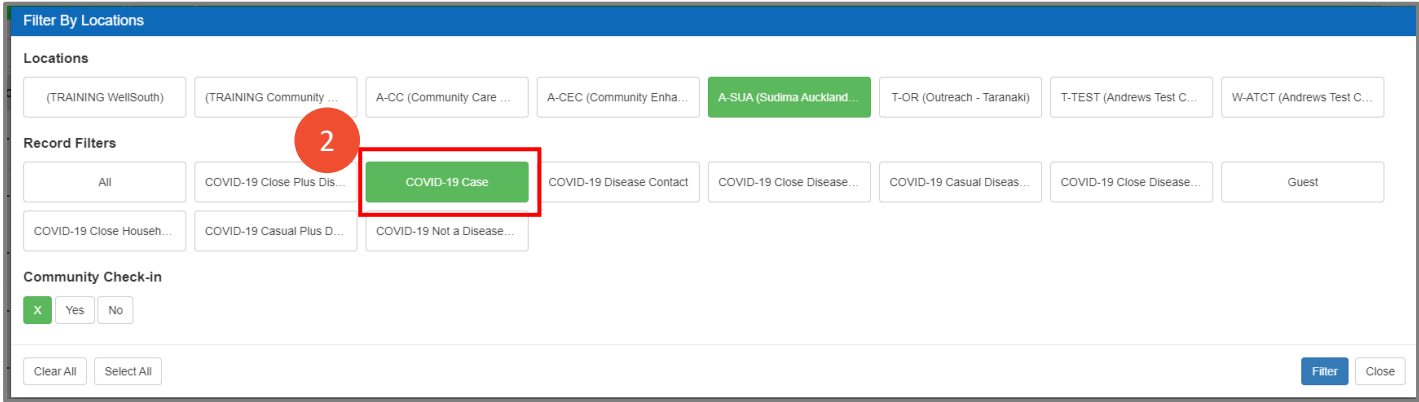

Description	What this means
<p>Update Day Zero Mapping for Case and Disease Contact</p>	<p>Important Note: This change is currently targeted to be released on the evening of Friday 24 February 2022.</p> <p>An update has been made to the Day Zero mapping for a Case and Disease Contact in CCCM. This update will enable CCCM to receive a Predicted Isolation Start Date and Predicted Isolation End Date from the NCTS so that these dates can be used in CCCM to show a correct Day Zero and Earliest Release Date.</p> <p>This means:</p> <ol style="list-style-type: none"> When a record is created in CCCM, the 'Day zero' date in the Bubble List will show the Predicted Isolation Start Date and the 'Earliest rel.' shows the Predicted Isolation End Date. The vital timeline will use that date to start the Chart and display Health Checks completed from today onwards. If this date changes in future (e.g. when a Contact becomes a Case), previously completed Health Checks, Notes etc. this will still show on the Timeline on the date they were completed. For a positive test, the date of the positive test will be reflected on the associated Day on the Vital Timeline and the Test Pop Up will display as a positive test. <div data-bbox="428 791 1274 1225"> <p>1</p>  </div> <div data-bbox="1309 791 2010 1046"> <p>2</p>  </div> <div data-bbox="1309 1046 2390 1218"> <p>3</p>  </div>

Other NCTS Changes

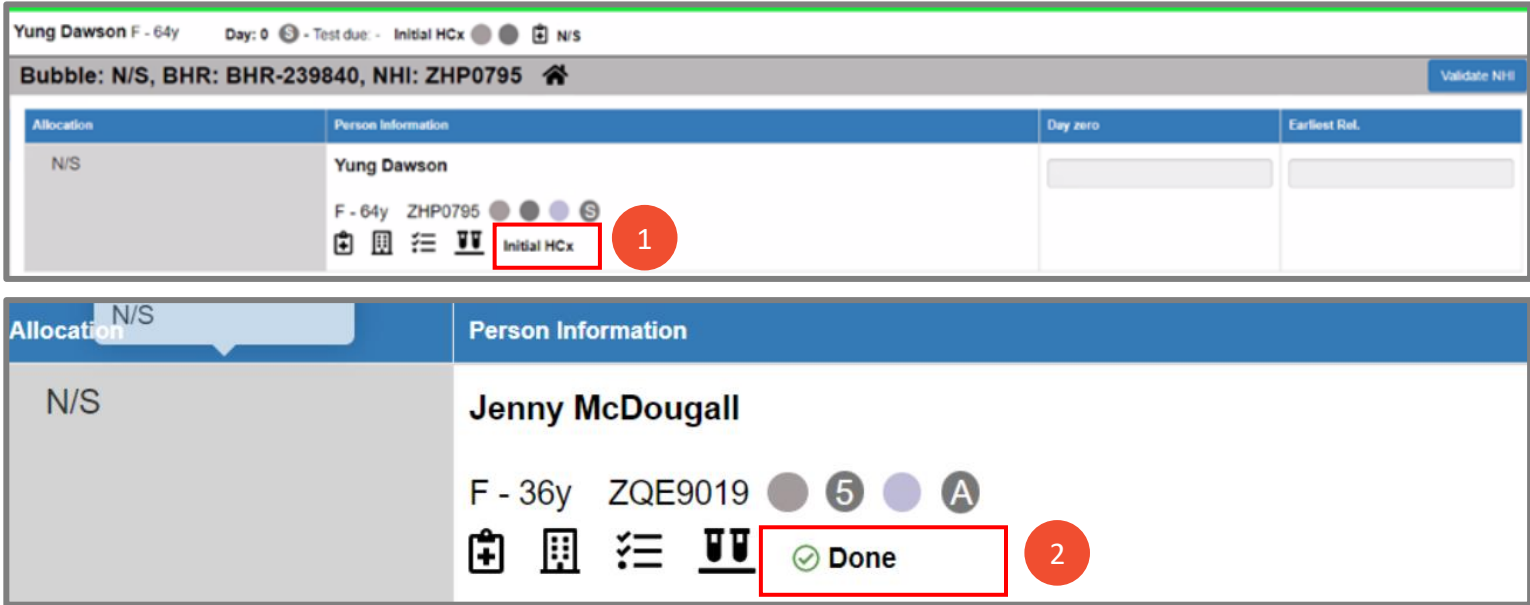

Description	What this means
Update to enable automatic calculation of predicted isolation start and end dates	<p>This change is targeted to be released on the evening of <u>Friday 24 February 2022</u>.</p> <p>Update to automatically predict the Isolation Period Start and End Dates for all Case Records based on upon symptom onset information.</p> <div data-bbox="1319 382 2420 664">  <p>The screenshot shows a form titled 'Isolation Information'. It contains several fields: 'Isolation Start Date' (16/02/2022), 'Isolation End Date', 'Swab Scheduled Date', 'Days in Isolation' (1), 'Location of Isolation', 'Ready for Release Review' (checkbox), and 'Predicted Isolation End Date' (27/02/2022). The 'Isolation Start Date' and 'Predicted Isolation End Date' fields are highlighted with red boxes, and the 'Predicted Isolation End Date' is also circled in blue.</p> </div>
Rapid Antigen Testing to enable Case Creation	Update to enable Rapid Antigen Test to automatically trigger NCTS Case creation.

Tips

Filter for Cases in CCCM

Description	What this means
How to filter for Cases in CCCM	<p>1. It has been noted that in some instances Positive COVID Cases may not appear with the red underline or positive icon.</p> <p>2. In order to accurately filter and only see positive cases you will need to filter by 'COVID-19 Case' this will display a list of all records that are being managed as a Case.</p> <div data-bbox="721 594 1979 792">  </div> <div data-bbox="644 811 2056 1209">  </div>

How to determine if an Initial Health Check has been completed?

Description	What this means
<p>As a Health Provider how to determine if an Initial Health Check has been completed</p>	<p>When reviewing a record from the Person Information tab, you can use the icons to determine whether an Initial Health Check has been completed:</p> <ol style="list-style-type: none"> In the first example, Yung Dawson's record indicates that an Initial Health Check is required. In the second example, Jenny McDougall's record indicates an Initial Health Check has been completed. <div data-bbox="659 594 2181 1193">  <p>The first screenshot shows the record for Yung Dawson, F - 64y, ZHP0795. The 'Initial HCx' icon is highlighted with a red box and a red circle with the number 1.</p> <p>The second screenshot shows the record for Jenny McDougall, F - 36y, ZQE9019. The 'Done' icon is highlighted with a red box and a red circle with the number 2.</p> </div>
