## Instructions to add new NCSP endorsed cervical screening outcomes for Medtech Evolution

The Outcome of a Screening Term can determine the recall period in which a patient should return for a further screening test.

1. To add a new Outcome for a Screening Term you need to access file>Options.

		M
Logon	Recent Patients	-
Lock Ctrl+Alt+L		Jalculato
Log O <u>f</u> f		
Close		8006
<u>P</u> rint Setup		
Change Password		
Change <u>U</u> ser Ctrl+F12		
E <u>x</u> it		
		Options

## 4. Select the Outcomes tab

<b>\$</b>	View Sci	reening Term		×	
Cervical Screeing	) (CX)				
Main Measuremen	nts Outcomes	Documents Aud	it		
Outcome	Description	Recall In	^		
H-ND	HPV not detected	5 years		Add	_

5. Outcomes particular to each Screening Term, along with a default recall period can be set up on this tab. A listing of Outcomes already added for the required term will be displayed (above is example only, please use NCSP endorsed cervical screening outcome codes & associated recall timeframes).

6.. Select the Add option to display the New Outcome screen.

7. Enter the information as described below

Code – H-ND

Description – HPV not detected.

Outcome indicator - Normal

Recall In: It is possible to specify the default time period for which an Outcome requires the patient to be recalled in, for example 5 years for a recall from the date of the screening.

Outcome Indicator: This field is used to indicate if this Outcome reflects a result that is Normal, Abnormal or Exempt.

Recall Document: A recall document can be linked to a specific outcome, for example a cervical screen with a normal recall may have a different letter linked to that of an abnormal outcome.

Outcome	e		Description		Recall In		^		
H-ND			HPV not detected			5 years			Add
