

How to find your unimmunised or partially immunised MMR patients using query builder on MedTech evolution

Unimmunised – No doses of MMR in PMS

Note – Under vaccination code make sure all MMR choices are ticked

Partially immunised guide (only received one dose of MMR vaccination in PMS)

The screenshot shows the 'Query Builder' application window. The 'Query' section has a name '1 MMR'. The 'Table' list on the left includes various medical data tables. The 'Where' section contains the following conditions:

Column	Condition
Patient - Registered	Equal to Registered (R)
Patient - Nhi No	Is NOT Blank
Immunisations - Vaccine Code	IN MMR (misc) (MMR),MMR 12m (MMR3),MMR 15m (MMR1),MMR 4y (MMR2),MMR Ad...
Patient - Dob	From Wed 01 Jan 1969
Count Function - Count Occurrence	Less Than 2

The 'Select' section contains the following fields:

Select
Patient - Name Full Name
Patient - Nhi No
Patient - Dob
Patient - ID for Merge
Count Function - Count Occurrence

Buttons for 'Run Query', 'Run SMS Query', and 'View SQL' are visible on the right. The status bar at the bottom shows 'TLS1 0' and 'Close Help' buttons.
