

Abdominal pain			
Patients with abdominal pain, who are haemodynamically stable			
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
Rehydration	\$158.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Abdominal Ultrasound if biliary colic is suspected			
Asthma			
Patients with moderate asthma exacerbation that can be safely managed in the community			
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Cellulitis			
Adult >= 15 years with cellulitis not responsive to oral treatment OR where oral treatment is not appropriate			
IV Cellulitis	\$87.00	Three only *	* extra IV antibiotic doses can be claimed if approved by secondary care - this must be documented
Cellulitis (ACC)			
Adult >= 15 years with cellulitis(ACC funded) not responsive to oral treatment OR where oral treatment is not appropriate			
ACC - IV Cellulitis	\$47.00	Two only	Cannot be claimed for the first dose of IV antibiotics
Chest Pain			
Patients with low risk undifferentiated chest pain that can be safely managed in the community. Patients with suspected acute coronary syndrome (ACS) with no current chest pain and > 8 hrs since the onset of last symptoms/chest pain			
ECG	\$39.00	Package of care	Includes consult time and any consumables
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
Congestive heart failure - exacerbation			
Adults with acute heart failure that can be safely managed in the community			
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
CXR to rule out pneumonia/pneumothorax			
COPD			
Patients with a moderate COPD exacerbation that can be safely managed in the community			
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
CXR to rule out pneumonia/pneumothorax			
DVT and DVT in pregnancy			
Suspected DVT (excluding pregnancy) with a Wells Score of >= 2 or a positive D-dimer : Superficial venous thrombosis : Pregnant women with a clinical suspicion of DVT(No Wells score or D-dimer required)			
DVT Negative GP/NP Follow Up	\$79.00		Follow up consultation with patient within the acute phase following negative result (only claimable once per referral/episode of care)
DVT Positive GP/NP Follow up	\$118.00	Packages of care which cannot be claimed with any other invoice on the same day	Follow up consultation with patient within the acute phase following positive result (only claimable once per referral/episode of care)
DVT Positive Treatment Enoxaparin PN	\$79.00		Follow up consultation with patient within the acute phase following positive result (only claimable once per referral/episode of care)
DVT Prophylactic Enoxaparin	\$79.00		Administration of Clexane (pre-scan) when the wait for a DVT USS or d-dimer is longer than 6 hours from initial consult.
GP/NP Extended consult	\$79.00	One only	At the time of acute presentation to a maximum of 30 minutes
Ultrasound			
DVT (ACC)			
ACC related: Suspected DVT (excluding pregnancy) with a Wells Score of >= 2 or a positive D-dimer : Superficial venous thrombosis : Pregnant women with a clinical suspicion of DVT(No Wells score or D-dimer required)			
ACC - DVT Prophylactic Enoxaparin	\$68.00	Packages of care which cannot be claimed with any other invoice on the same day	Administration of Clexane (pre-scan) when the wait for a DVT USS or d-dimer is longer than 6 hours from initial consult
ACC - DVT Treatment Enoxaparin PN	\$79.00		Follow up consultation with patient within the acute phase following positive result (only claimable once per referral/episode of care)
ACC - DVT Positive Treatment GP	\$79.00		Follow up consultation with patient within the acute phase following positive result (only claimable once per referral/episode of care)
NB: If the ACC DVT scan result is negative but the patient still requires a face to face follow up consult, please claim this as ACC only.			
Ultrasound			
Dehydration			
Adults with moderate dehydration not responsive to oral fluids +/- antiemetic that can be safely managed in the community			
Children aged between 6 months and 15 years with moderate dehydration or at risk of getting severely dehydrated,that can be managed safely in the community			
Rehydration	\$158.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
ED Redirect			
This service is designed to ensure low acuity presentations to ED are actively redirected back to primary care.ED will not redirect a patient unless the receiving practice has accepted them			
In the first instance, all patients will be referred back to their registered general practice if there is an appointment available. Should an appointment not be available the patient will be referred to one of the contracted overflow providers, currently Medicros and Phoenix Urgent Doctors.			
The initial consultation fee is funded for eligible patients.For conditions that meet Primary Options Acute Care criteria, practices can then initiate a referral and claim via the usual Primary Options Acute Care processes			
ED redirect GP/NP consultation	\$89.00		Initial consultation for a redirected patient.
ED redirect GP/NP consultation after hours	\$100.00	One only	Initial consultation for a redirected patient after 5pm on a weekday, on weekends or public holidays.
ED redirect sundries	Variable		This requires an itemised list of any extra charges incurred by the patient.
ENT			
ENT conditions that can be acutely and safely managed in the community, such as epistaxis			
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
Fever unknown origin - children			
Febrile (>38 C) children with moderate/amber symptoms or signs that can be safely managed in the community			
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Gastroenterology			
Adults with moderate dehydration not responsive to oral fluids +/- antiemetic that can be safely managed in the community			
Children aged between 6 months and 15 years with moderate dehydration or at risk of getting severely dehydrated,that can be managed safely in the community			
Practice observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
Rehydration	\$158.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		

Hyperemesis gravidarum			
Women with moderate dehydration secondary to hyperemesis gravidarum not responsive to oral fluids +/- antiemetic that can be safely managed in the community			
Rehydration	\$158.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Ingested foreign body			
Ingested metal foreign body in children – with no red flags i.e. if object is a disc battery, sharp object, Object >5cm, multiple magnets			
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
CXR			
IV Adenosine in the management of SVT			
Patients with rapid palpitations and a systolic BP >100, where an ECG performed shows a regular narrow complex (QRS<= 120msec) tachycardia in whom vagal manoeuvres have been unsuccessful			
IV Adenosine	\$110.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
Musculoskeletal			
Adults for suspicion of pathological fracture where there is no history of injury : Children aged 8-16 years for suspicion of SUFE			
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
Hip X ray: for suspicion of SUFE.			
X ray: for suspicion of pathological fracture where there is no history of injury			
Neurology			
Patients with acute neurological conditions that can be managed safely in primary care e.g. migraine			
Rehydration	\$158.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Renal/Urological			
Patients with acute urological problems that can be managed safely in primary care e.g.			
<ul style="list-style-type: none"> • Acute indwelling catheter insertion for patient in acute urinary retention in the absence of red flags i.e. acute trauma – straddle injury/fractured pelvis, perineal haematoma • Blocked catheter, which cannot be unblocked by flushing • Uncomplicated pyelonephritis • Renal colic with no red flags i.e. AAA, temperature >38, pyelonephritis, peritonitis, biliary colic, testicular torsion, ovarian torsion, ectopic pregnancy 			
Acute catheter insertion	\$147.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
Practice observations	\$1 /min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Renal ultrasound: for suspicion of renal colic/stones where CT is not available or appropriate.			
Respiratory/Pneumonia			
Adults with pneumonia that can be managed safely in primary care – moderate pneumonia (CRB65 score 1 or 2 – see below) with no other co-morbidities : Children with pneumonia that can be safely managed in the community			
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
CXR			
Severe allergic reaction			
Patients with a severe allergic reaction, who have not had anaphylaxis, are haemodynamically stable and can be safely managed in the community: Moderate allergic reaction requiring observation in general practice.			
Practice observations	\$1 /min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
Women's Health			
Patients who are haemodynamically stable with pelvic pain and can be safely managed in the community.			
Investigation of retained products of conception – where patient no longer qualifies for maternity funding i.e. TOP/Miscarriage – more than 14 days post event or vaginal delivery – more than 6 weeks post-delivery			
IV Medication	\$87.00	Package of care	Cannot be claimed with any other invoice on the same day. Includes consult time and any consumables
Practice observations	\$1 /min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
GP/NP Extended consult	\$79.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
GP/NP Follow-up Consult	\$79.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
RN Follow-up consult	\$39.00		
RN home visit	\$79.00		
GP/NP home visit	\$126.00		
Pelvic ultrasound: for suspicion of ruptured ovarian cyst or for suspicion of retained products of conception in patients not eligible for maternity funding (i.e. is more than 14 days post termination of pregnancy/miscarriage or more than six weeks post vaginal delivery).			
In all categories where extended consultations, follow up consultations and practice observations can be claimed Phoenix and Medicross UCC can claim the following instead of the standard claim			
Urgent Care Extended consultation	\$100.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
Urgent Care Follow up consult	\$100.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
Urgent Care Practice observations	\$1/min	Maximum 6 hours	Practice observations can only be claimed at the time of the initial consult
In all categories where extended consultations, follow up consultations and practice observations can be claimed rural practices can claim the following instead of the standard claim			
Rural GP/NP Extended consultation	\$89.00	Maximum 2	At the time of acute presentation to a maximum of 30 minutes
Rural GP/NP Follow up consult	\$89.00	One only	Limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult
Rural RN Follow up consult	\$50.00		
Rural Practice Observations	\$1/min	Maximum 3 hours	Practice observations can only be claimed at the time of the initial consult
<p>Packages of care Cannot be claimed with any other invoice on the same day. They include allocation for staff time as well as consumables</p> <p>Practice observations Practice observations – maximum 3 hours (or 6 hours for urgent care clinics) and based on treatment provided as evidenced in clinical notes. This can be claimed provided no IV administration invoices are claimed. This invoice can only be claimed at the time of the initial consultation. In-clinic observations can be claimed based on 3 x 10-minute baseline observations per hour. Practice observations can only be claimed at the time of the initial consult.</p> <p>GP/NP extended consultation To cover an additional 15 minutes of GP/NP time above the initial 15-minute consultation. This invoice can be claimed twice per episode of care to fund a maximum of 30 minutes of additional time. This invoice can only be claimed at the time of the initial consultation.</p> <p>GP/NP follow up RN follow up A follow-up visit may be funded (based on treatment provided as evidenced in clinical notes). This is limited to one per episode of care within 3 days of the initial consult and cannot be claimed on the day of the initial consult.</p> <p>Mileage \$0.77 cents per kilometre. Can be claimed in conjunction with a home visit.</p>			
Urgent diagnostics can be accessed and co-ordinated by general practice or urgent care clinics without contacting the Primary Options team. Bookings can be made by the practice or the patient.			
Patients can arrange their own radiological investigation provided they have the required documentation with them, which includes the referral from the practice and the primary options claim number. This is dependent on the investigation being one of those listed above. Any investigations not listed will not be funded, irrespective of whether the practice has provided the patient with a claim number.			
Patients who are not acutely unwell and do not require a same day diagnostic test are not funded under POAC and should be referred to primary referred radiology. Radiology is only funded for same-day investigations, with the exception of ultrasounds through the DVT pathway which can be the next day with enoxaparin coverage.			
GP provided point of care ultrasound is excluded from POAC services – it is expected that patients will be charged for this service.
